

Promisemed

Verisafe® Regular Huber Needles

330 PSI PVC FREE NON-CORING LATEX FREE DEHP FREE

FEATURES AND BENEFITS

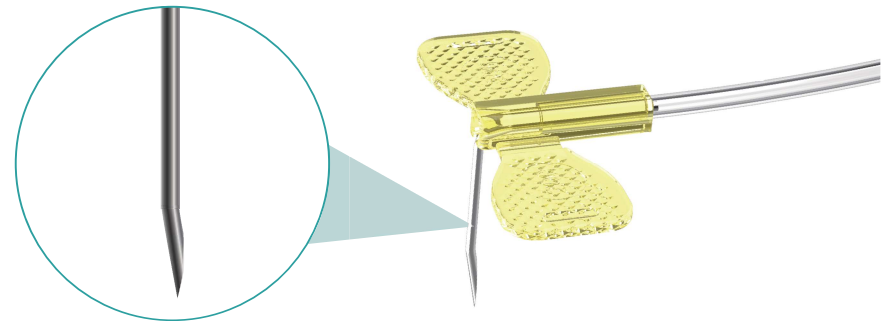

Promisemed Verisafe® Regular Huber Needles are non-coring safety needles for implanted vascular ports, allowing high pressure injection (up to 330 psi).

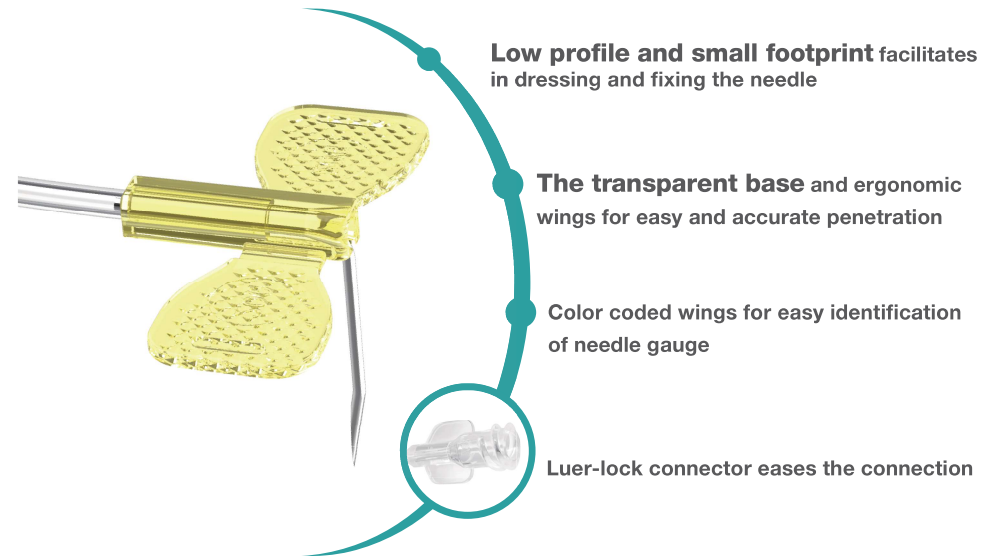

Reliable

- **The special bevel reduces the coring of the septum**

to maximize the service life of the port and minimize the risk of the coring entering the patient

Ease the Use

Low profile and small footprint facilitates in dressing and fixing the needle

The transparent base and ergonomic wings for easy and accurate penetration

Color coded wings for easy identification of needle gauge

Luer-lock connector eases the connection

Comfort

- The designed needle allows low penetration force

Meet Multiple Demands

- Optional high pressure resistant injection (up to 330 psi)
- Lure-activated needleless Y-site and without Y-site are available
- Needle gauge varies from 19G to 22G
- 15mm, 19mm, 25mm and 38mm needle lengths for your choice
